

# Subject Index to Volume 31

- Acetazolamide, pH and bicarbonate altered by, maturation effects, choroid plexus, cerebrospinal fluid, and brain, R909
- Acid, acute load, intracellular bicarbonate buffer system in response to, R305
- Acid-base balance  
acute load, intracellular bicarbonate buffer system in response to, R305  
blood gases and, prolonged stable hypothermia (rat, squirrel), R190  
regulation, exercise, R126
- Acidosis, lactic, intracellular bicarbonate buffer system in response to, R305
- Adenosine diphosphate, mitochondrial production of, recovery metabolism of white muscle and (trout), R295
- Adenosine monophosphate, cyclic,  $\beta$ -adrenoceptors, hepatocyte, cortisol effects (trout), R794
- Adenosine triphosphate, mitochondrial production of, recovery metabolism of white muscle and (trout), R295
- Adipocytes, size, hyperphagia relations, developing male obese rats, R33
- Adipose tissue  
accelerated reproductive development, body fat and (ground squirrel), R646  
adipocyte size, hyperphagia and, developing male obese rats, R33  
brown: *see* Brown fat  
white, hormone-sensitive and lipoprotein lipase mRNA (marmot), R177
- Adrenal gland  
catecholamine secretion  
carotid vascular receptor control of, R872  
insulin-induced hypoglycemia, R659
- Adrenergic mechanisms, developing heart (frog), R150
- Adrenocorticotropin  
stress changes, R1033  
vasopressin responses, cardiac nerve blockade, awake state, R51  
vasopressin secretion and, medullary pathways for, R1047
- Afferent nerves  
renal  
age-dependent changes, genetic hypertension, R834  
inputs to ascending spinal pathways, R165  
vagal, expiratory bulbospinal neurons, R1087
- Aging  
analbuminemia, absence of focal glomerulosclerosis, R947  
fever, TNF and interleukin-6, R211  
genetic hypertension and, changes in afferent renal nerve activity, R834  
insulin secretion, glucose sensitivity and, endocrine pancreas, R671  
renal concentrating ability, vasopressin relations, R826
- Aldosterone  
during exercise, blood volume increase by water immersion and, R779  
food deprivation, refeeding and (camel), R1000
- oral loading with saline or water, fluid retention after (camel), R915  
plasma, modulation in hydrogen ion concentration, R269  
secretion, angiotensin II stimulation of, endothelin-1 effects, R85  
short-term effects, sodium-chloride transport, colon (horse), R939
- Amiloride, sodium-chloride transport and, colon (horse), R939
- Amino acid carrier, methylmercury transport by, blood-brain barrier, R761
- Amino acids  
excitatory, ACTH and vasopressin secretion, R1047  
intravenous, daily food intake and, R225  
receptors: *see* Receptors  
 $\gamma$ -Aminobutyric acid, ACTH and vasopressin secretion, medullary pathways for, R1047
- Amygdaloid nucleus, medial, vasopressin-induced antipyresis in, awake state, R901
- Anaerobiosis, vertebrate, anoxic brain (turtle), R517
- Analbuminemia, absence of glomerulosclerosis, aging and, R947
- Anesthesia, normal unrestrained activity and, renal blood flow variations, R926
- Anesthetics, differential renal hemodynamics, area postrema stimulation inducement of, R289
- ANF: *see* Atrial natriuretic factor
- Angiotensin  
brain, thirst and (cattle), R204  
sinoaortic denervation effects, pressor responses in pregnancy, R1100  
water and sodium chloride intake, R382
- Angiotensin II  
central ANP effects, dehydration and hypovolemia, R746  
dehydration, brain metabolism and, R310  
insulin antinatriuresis and, euglycemia, R1145  
intracerebroventricular, hypothalamic stimulation in pregnancy, R604  
reduced kidney mass, salt-induced hypertension, R61  
stimulation of aldosterone secretion, endothelin-1 effects, R85
- Anoxia  
brain, subcellular enzyme binding and glycolysis in (turtle), R517  
oxidative and glycolytic pathways during, brain (rat, turtle), R595  
sodium channel downregulation during, brain (turtle), R712  
temperature and, cerebral blood flow (turtle), R538
- ANP: *see* Atrial natriuretic peptide
- Antidiuretic hormone: *see also* Vasopressin  
hypotension and, awake state, R51
- Antipyresis, vasopressin-induced, medial amygdaloid nucleus, awake state, R901
- Aorta, abdominal, dietary lipids and connective tissue matrix, R389
- Apnea, respiratory patterns, developmental changes, fetus (lamb), R452
- Arachidonic acid, changes, fetal and early postnatal development, R8
- Area postrema  
CCK effects, CCK-A receptor mediation of (pig), R1154  
stimulation, renal hemodynamics and, R289
- L-Arginine,  $N^G$ -monomethyl-, pressor responsiveness of vasoconstrictors and, awake state, R1137
- Arteriovenous fistula, renal response to ANF, captopril effects, high-output heart failure, R509
- Atrial natriuretic factor  
cardiac gene expression, hemodynamic overload and, R364  
renal responsiveness to, captopril effects, high-output heart failure, R509
- Atrial natriuretic peptide  
central administration, dehydration and hypovolemia, awake state, R746  
cerebrospinal fluid formation and (sheep), R860
- C-type, chloride secretion and, rectal gland (dogfish), R707  
during exercise, blood volume increase by water immersion and, R779  
excretion, water immersion effects, R993  
infusion, decreased cardiac output, awake state, R120  
oral loading with saline or water, fluid retention after (camel), R915  
renal actions, comparisons with urodilatin, R395
- Atriopeptin III, renal actions, comparisons with urodilatin, R395
- Atropine, granular cell exocytosis, serotonin release and, cerebral arteries, R105
- Autoregulation, presynaptic supersensitivity, smooth muscle, R400
- AV3V: *see* Cerebral ventricles, anteroventral third
- Awake state  
ANP actions, anephric dogs, R120  
baroreflex function, pregnancy, R472  
central ANP administration, dehydration and hypovolemia, R746  
cerebrospinal fluid formation, ANP and (sheep), R860  
hypotension, vasopressin and, R51  
increased neck vein pressure effects, intestinal lymphatic pressure (sheep), R892  
vasoconstrictors, NMA and nitroarginine inhibition of, R1137  
vasopressin-induced antipyresis, medial amygdaloid nucleus, R901
- Behavior, normal unrestrained activity, renal blood flow variations, R926
- Bernoulli equation, gravity and circulation (giraffe), R725
- Bicarbonate  
acetazolamide-altered, maturation effects, choroid plexus, cerebrospinal fluid, and brain, R909

- Bicarbonate (*continued*)  
intracellular buffer system, response to acute acid load, R305
- Biomechanics, vertebrae, fat-sucrose effects, R318
- Blockade  
adrenergic, TNF- $\alpha$  effects and, R628  
 $\alpha_1$ -adrenergic, intrarenal hemodynamics and, heart failure, R198  
cardiac nerve, vasopressin during, awake state, R51
- Blood  
responses  
cold stress after artificially induced sunburn, R617  
heat after artificially induced sunburn, R610
- Blood-brain barrier  
methylmercury transport, amino acid carrier and, R761  
peripheral nerve, manganese transport in, R284
- Blood flow: *see also* Circulation; Microcirculation  
captopril effects, pregnant mother and fetus (sheep), R754  
cerebral, temperature and anoxia effects (turtle), R538  
ear, neurogenic vasodilator control of, R766  
renal  
area postrema stimulation and, R289  
normal unrestrained activity, awake state, R926  
reduced arterial perfusion pressure (chick), R90  
reproductive organ, radiolabeled microspheres, R666
- Blood ions, regulation, exercise, R126
- Blood-nerve barrier, peripheral nerve, manganese transport in, R284
- Blood pressure: *see also* Pressure  
acute and chronic hyperosmolality, vasopressin role in, R25  
central ANP effects, dehydration and hypovolemia, R746  
control, naloxone and, during hemorrhage, R444  
gravity effects (giraffe), R725  
 $\gamma$ -MSH effects, spontaneous hypertension, R77  
plasma renin activity and, fetus and newborn (lamb), R524  
pressure natriuresis and angiotensin II, salt-induced hypertension, R61  
response to vasopressin,  $V_1$ - and  $V_2$ -receptors and, fetus (sheep), R636  
salt-induced hypertension, sinoaortic-denervated uninephrectomy and, R733  
smoke exposure effects, awake state, R738  
spatial and temporal differing control, during hemorrhage, R579  
vasopressin responses, cardiac nerve blockade, awake state, R51  
volume expansion and, newborn (lamb), R651
- Blood-tissue exchange, geometry, flight muscle (bat), R955
- Blood volume  
decreased cardiac output, ANP infusion, awake state, R120  
increase by water immersion, fluid-regulating hormones during exercise, R779
- volume expansion and, newborn (lamb), R651
- water immersion effects, R993
- Body  
composition  
accelerated reproductive development and (ground squirrel), R646  
dietary obesity and, R684  
dietary obesity and, inbred mouse strains, R1025  
proportions, scaling of, model, terrestrial mammals, R492  
size, maximum heart rate and (shrew), R842  
weight: *see* Weight
- Bone, calcium metabolism, diurnal rhythms in, R235
- Bradycardia, baroreflex-mediated, augmentation in pregnancy, awake state, R472
- Bradykinin  
gastric-cardiovascular reflexes induced by, histamine modulation of, R112  
kidney tubular effects of, R72
- Brain  
acetazolamide-altered pH and bicarbonate, maturational differences, R909  
angiotensin, thirst and (cattle), R204  
anoxia  
oxidative and glycolytic pathways (rat, turtle), R595  
subcellular enzyme binding and glycolysis in (turtle), R517  
blood flow: *see* Blood flow, cerebral erythropoiesis, iron status and, fetus (sheep), R485  
metabolic responses, progressive water deprivation, R310  
natriuretic peptide, chloride secretion and, rectal gland (dogfish), R707  
sodium channel downregulation, during anoxia (turtle), R712  
sodium pump activity, pineal modulation of, R698
- Brain stem  
area postrema stimulation, differential renal hemodynamics with two anesthetics, R289  
caudal, bombesin-like peptides and, R39  
lesions, rhythms in sympathetic nerve discharge and, R1015
- Breathing: *see* Respiration
- Brown fat  
atrophy, after capsaicin, R562  
long-term decrease, capsaicin and, R568  
response, exercise in low temperatures, R921  
thermogenesis, circadian changes in, R504
- Brush-border membrane vesicles, hepatopancreatic, sulfate-chloride exchange in (lobster), R255
- Calbindin, turnover, regulation, intestine and shell gland (chicken), R800
- Calbindin mRNA, regulation of, intestine and shell gland (chicken), R800
- Calcium  
dietary, influence on calcium intake, spontaneous hypertension, R370  
transfer, release, and resorbing activity, bone, diurnal rhythms in, R235
- Calcium antagonists, natriuresis induced by, renal interstitial hydrostatic pressure during, R432
- Calcium currents, inhibition, antifreeze proteins, R542
- Cancer cachexia, IGF-I in, host and tumor responses to, R426
- Capsaicin  
brown fat atrophy after, R562  
desensitization, body weight regulation in, R568
- Captopril  
acute effects, pregnant mother and fetus (sheep), R754  
insulin effects, sodium excretion, euglycemia, R1145  
renal response to ANF and, high-output heart failure, R509  
thirst, brain angiotensin and (cattle), R204
- Carbachol, serotonin release and, cerebral arteries, R105
- Cardiac output, decreased, ANP infusion, awake state, R120
- Cardiovascular responses, autonomic, smoke exposure, awake state, R738
- Carotid artery, occlusion, adrenal catecholamine secretion and, R872
- Catecholamines  
central ANP effects, dehydration and hypovolemia, R746  
content, CNS, after AV3V ablation, R1064  
generation, swimming effects, R464  
responsiveness, hepatocyte  $\beta$ -adrenoceptors and (trout), R794  
secretion  
adrenal, carotid vascular receptor control of, R872  
adrenal, during hypoglycemia, R659
- CKK: *see* Cholecystokinin
- CKK-8: *see* Cholecystokinin octapeptide
- Cells, mechanical stimulators, growth and, R350
- Central nervous system  
coronary vasoconstriction, hemodynamic patterns of, R276  
oxidative and glycolytic pathways, during anoxia (rat, turtle), R595
- Cerebral artery  
carbachol effects, granular cell exocytosis and serotonin release, R105  
changes, pregnancy-induced (sheep), R137
- Cerebral cortex, sodium pump activity, pineal modulation of, R698
- Cerebral ventricles, anteroventral third, CNS catecholamine and norepinephrine after, R1064
- Cerebrospinal fluid  
acetazolamide-altered pH and bicarbonate, maturational differences, R909  
circadian variations in, MRI measurement, R20  
formation, ANP and (sheep), R860
- Chloride  
reabsorption, Henle's loop, salt-sensitive hypertension, R263  
secretion, C-type natriuretic peptide stimulation of, rectal gland (dogfish), R707  
uptake, loop, hypertension and salt-sensitivity, R263
- Cholecystokinin  
effect on vasopressin, CCK-A receptor mediation of (pig), R1154  
receptor antagonist, food intake and, R216

- satiety actions of, CCK receptor attenuation of, R46  
satiety and, R241  
Cholecystokinin A, receptor: *see* Receptors  
Cholecystokinin octapeptide, infusion, inhibition of feeding and, R975  
Cholesterol  
  changes, postnatal development, R8  
  plasma, absence of focal glomerulosclerosis, aging and, R947  
  sucrose-induced elevation, microvascular injury, R144  
Cholinergic mechanisms, developing heart (frog), R150  
Choroid plexus, acetazolamide-altered pH and bicarbonate, maturational differences, R909  
Circadian clock, resetting, phase-response relations (hamster), R1149  
Circulation: *see also* Blood flow;  
  Microcirculation  
    gravity effects (giraffe), R725  
    microvascular, pregnancy-induced changes (sheep), R137  
    peripheral, neurogenic vasodilator control of, R766  
Colchicine, stimulation, intestinal D-glucose transport (teleost), R412  
Cold  
  exercise in, sympathetic nervous system response, R921  
  exposure, thermoregulation after artificially induced sunburn, R617  
  tolerance, inhibition of calcium and potassium currents, R542  
Collagen, dietary lipid modulation, abdominal aorta, R389  
Colon, sodium-chloride transport across, aldosterone effects (horse), R939  
Concanavalin A, age-dependent lymphoid function, spontaneous hypertension, R1  
Converting enzyme  
  inhibition  
    ANF and, heart failure, R509  
    thirst, brain angiotensin and (cattle), R204  
Corn oil, intake, ontogeny of, preweanling, R624  
Cortisol  
   $\beta$ -adrenoceptors, hepatocyte (trout), R794  
  CCK effects, CCK-A receptor mediation of (pig), R1154  
  food deprivation, refeeding and (camel), R1000  
Cryobiology, freeze tolerance (turtle), R530  
Cryoprotectants, freeze tolerance (turtle), R530  
Cyanide, excitation, medullary sympathoexcitatory neurons, R182  
Cysteine, methylmercury transport by, blood-brain barrier, R761  
Cytochrome c, status, intrauterine hypoxemia and erythropoietin, fetus (sheep), R485  
Cytochrome oxidase, activity, during anoxia, brain (rat, turtle), R595  
Cytokines  
  administration by adrenergic blockade, glucose metabolic changes and, R628  
  interleukin-6 and, fever, aging changes, R211  
Dehydration  
  acute and chronic hyperosmolality, vasopressin role in, R25  
  angiotensin and, brain (cattle), R204  
  hypovolemia and, central ANP administration, awake state, R746  
  metabolic response, cerebral, R310  
2-Deoxyglucose, metabolic changes, TNF- $\alpha$  effects and adrenergic blockade, R628  
Deoxyribonucleic acid, synthesis, stretch-mediated growth, visceral smooth muscle, R895  
Desmosine, dietary lipid modulation, abdominal aorta, R389  
Detrusor muscle, stretch-mediated growth, R895  
Devazepide, food intake increase and, R216  
Development: *see also* Growth; Maturation  
  accelerated, reproduction, body fat and (ground squirrel), R646  
  postnatal  
    long-chain fatty acid changes in, R8  
    triacylglycerol changes during, R8  
Dextrose, intravenous, daily food intake and, R225  
Diabetes, cardiorespiratory effects of neuropeptide Y, nucleus tractus solitarius, R865  
Diaphragm, respiratory patterns, developmental changes, fetus (lamb), R452  
Diphenhydramine, modulation, bradykinin-induced reflexes, R112  
Diuresis, oral loading, water or saline (camel), R915  
Docosahexaenoic acid, changes, fetal and early postnatal development, R8  
Dopa-dopamine system, immersion effects, R993  
Drinking  
  thirst  
    brain angiotensin and (cattle), R204  
    swallowing and vasopressin secretion, concentration thresholds for, fetus (sheep), R1057  
Eating: *see* Feeding  
Elastin, dietary lipid modulation, abdominal aorta, R389  
Endothelin-1, angiotensin II stimulated aldosterone secretion, R85  
Endothelium-derived relaxing factor  
  basal cardiopulmonary and renal function, R720  
  NMA and nitroarginine inhibition of, awake state, R1137  
Energy, expenditure, body weight regulation, capsaicin and, R568  
Enterostatin, inhibition, fat intake, R1111  
Epinephrine, secretion, adrenal, during hypoglycemia, R659  
Erythrocyte ions, regulation, exercise, R126  
Erythropoietin, intrauterine hypoxemia, fetal iron and cytochrome c status after (sheep), R485  
Estradiol, phase-shift circannual rhythms (squirrel), R1096  
Ethanol, vitamin B<sub>6</sub> transport and, placenta, R966  
Euglycemia, insulin antinatriuresis in, verapamil prevention of, R1145  
Exercise  
  acute acid load, intracellular bicarbonate buffer system in response to, R305  
  cold stress and, thermoregulation after sunburn, R617  
  energetic cost of locomotion (wallaby), R771  
  fluid-regulating hormones during, water immersion increase in blood volume and, R779  
  heart rate, contractile properties and myosin composition (shrew), R842  
  heat stress and, thermoregulation after sunburn, R610  
  intermittent, endurance and (ghost crab), R852  
  maximal, blood ion regulation during, R126  
  normal unrestrained activity, renal blood flow variations, R926  
  recovery metabolism, white muscle, mitochondria role in (trout), R295  
  reduction of glutamine synthetase mRNA, hypertrophied muscle, R1131  
  swimming, vascular fatty acid and prostanoid changes with, R464  
  sympathetic nervous system response to, low temperatures, R921  
  vigorous, metabolic fate of lactate after (frog), R245  
  weight bearing, skeletal muscle gene expression and, R329  
Fasting  
  sympathetic FFA mobilization and, VMH-lesioned rats, R981  
  vascular fatty acids, prostanoids and, swimming effects, R464  
Fat  
  body  
    long-term decrease, capsaicin and, R568  
    reproduction relations (ground squirrel), R646  
  changes related to, vertebrae, R318  
  intake  
    differential inhibition by enterostatin, R1111  
    ontogeny of, preweanling, R624  
Fatty acids  
  free, mobilization, exercise-induced, fasting effects, R981  
  long-chain, fetal and early postnatal development, R8  
  vascular, prostanoids and, swimming effects, R464  
  volatile, transport mechanisms, gastrointestinal, vertebrate, R547  
Feeding  
  adipocyte size, hyperphagia and, developing male obese rats, R33  
  bombesin-like peptides, caudal brain stem mediation of, R39  
  CCK-induced satiety, mediation by CCK-A receptors, R574  
  corn oil and sucrose, ontogeny of intake, preweanling, R624  
  diet  
    changes in vertebrae and, R318  
    obesity from, inbred mouse strains, R1025  
  dietary calcium, spontaneous hypertension and, R370  
  dietary obesity  
    mifepristone reversal of, R1106  
    skeletal muscle composition in, R684

Feeding (*continued*)

- fat intake, differential inhibition by enterostatin, R1111
  - food deprivation, refeeding and (camel), R1000
  - food intake
    - CCK and satiety, R241
    - increase, devazepide effects, R216
    - intravenous glucose, amino acids, and lipid effects, R225
  - glucagon and CCK-8 infusion effects, R975
  - high-fat diet
    - adipocyte size and hyperphagia relations, R33
    - differential inhibition by enterostatin, R1111
  - intestinal satiety, CCK-receptor antagonists and, R554
  - intravenous diet, nutrient effects on food intake, R225
  - satiety, CCK receptor attenuation of, R46
  - sham, chronic decerebration, R1070
  - sodium appetite, acute sodium deficit and, R419
  - suppression, hypothalamic organization of, R586
- Fetal alcohol syndrome, vitamin B<sub>6</sub> transport, ethanol effects, placenta, R966
- Fetus: *see also* Placenta; Pregnancy development, long-chain fatty acids during, R8
- intravenous saline infusion, effects on liquid secretion, lung (sheep), R1117
  - iron and cytochrome c status, erythropoiesis and (sheep), R485
  - mother and, captopril effects (sheep), R754
  - nutrition, ethanol effects on placenta, R966
  - plasma renin activity, renal perfusion pressure decrease effects (lamb), R524
  - postnatal development, triacylglycerol changes during, R8
  - renin gene expression, renal nerve modulation at birth (lamb), R459
  - respiratory patterns, developmental changes (lamb), R452
  - swallowing and vasopressin secretion, concentration thresholds for (sheep), R1057
- Fever
- TNF and interleukin-6 with, aging changes, R211
  - vasopressin-induced antipyresis, medial amygdaloid nucleus, awake state, R901
- FFA: *see* Fatty acids, free
- Filtration, glomerular, salt-induced hypertension, R61
- Flow, CSF, circadian variations in, R20
- Fluid
- balance
    - food deprivation and refeeding effects (camel), R1000
    - swallowing and vasopressin secretion, fetus (sheep), R1057
  - cerebrospinal: *see* Cerebrospinal fluid retention, oral loading with water or saline (camel), R915
- Freezing, natural survival (turtle), R530
- Galanin,  $\alpha_2$ -adrenergic regulation of, pancreas, R819

## Gas

- blood
  - captopril effects, mother and fetus (sheep), R754
  - prolonged stable hypothermia (rat, squirrel), R190
- Gastric bubble, insertion, CCK and satiety, R241
- Gastrointestinal fermentation, volatile fatty acid transport, vertebrates, F547
- Gene expression
  - endotoxin-induced acute-phase protein, modulation by TNF- $\alpha$  monoclonal antibody, R786
  - fast-twitch muscle, chronic low-frequency stimulation and, R333
  - myosin heavy-chain, load-induced changes, R346
  - reduction of glutamine synthetase mRNA, hypertrophied muscle, R1131
  - regulation of calbindin mRNA, intestine and shell gland (chicken), R800
  - renin, renal nerve modulation at birth (lamb), R459
  - skeletal muscle, changes with altered weight bearing, R329
  - stretch and force generation, skeletal muscle, R356
  - switches, cardiac, pressure and volume overload, R364
- Glomerulosclerosis, focal, absence of, analbuminemia, aging, R947
- Glucagon
  - infusion, inhibition of feeding and, R975
  - metabolic changes, TNF- $\alpha$  effects and adrenergic blockade, R628
- Glucose
  - catecholamine secretion and, insulin-induced hypoglycemia, R659
  - intravenous, daily food intake and, R225
  - metabolic changes, TNF- $\alpha$  effects and adrenergic blockade, R628
  - plasma, food deprivation and refeeding effects (camel), R1000
  - sensitivity, endocrine pancreas, age and gender effects, R671
  - sucrose-induced elevation, microvascular injury, selenium and, R144
  - turnover, stress changes in, R1033
- D-Glucose, transport, intestinal, stimulation by 17 $\alpha$ -methyltestosterone (teleost), R412
- Glutamine synthetase, reduction, hypertrophied skeletal muscle, R1131
- $\gamma$ -Glutamyltransferase, methylmercury transport by, blood-brain barrier, R761
- Glutathione, methylmercury transport by, blood-brain barrier, R761
- Glycolysis, regulation, subcellular enzyme binding and, anoxic brain (turtle), R517
- Glycolytic pathways, during anoxia, brain (rat, turtle), R595
- Glycogen, synthesis, after vigorous exercise (frog), R245
- Granular cells, exocytosis, carbachol effects, cerebral arteries, R105
- Gravity, circulation and (giraffe), R725
- Growth: *see also* Development; Maturation cell, mechanical forces and, R350
- muscle, myofibril remodeling, R339
- stretch-mediated visceral, smooth muscle, R895

- Growth factors, mechanical forces, cell growth, R350
- Guanosine diphosphate, binding, circadian changes, brown fat, R504
- Guanosine monophosphate, cyclic, excretion, renal actions of urodilatin and ANP, R395
- Gustatory response
  - bombesin-like peptides, caudal brain stem mediation of, R39
  - corn oil and sucrose, ontogeny of intake, R624
  - sham feeding, chronic decerebration, R1070
- Heart
  - developing, neurotransmission in (frog), R150
  - erythropoiesis, iron status and, fetus (sheep), R485
  - failure, glomerular dynamics in, R198
  - high-output failure, captopril effects on renal response to ANF, R509
  - metabolic and cardiodynamic responses, ischemia and reperfusion (turtle), R437
  - response to exercise, low temperatures, R921
- Heart rate
  - acute and chronic hyperosmolality, vasopressin role in, R25
  - maximum, contractile properties and myosin composition (shrew), R842
  - response to vasopressin, V<sub>1</sub>- and V<sub>2</sub>-receptors and, fetus (sheep), R636
  - resting mean arterial pressure and, pregnancy, awake state, R472
  - smoke exposure effects, awake state, R738
  - stress-induced tachycardia, hypothalamic excitatory amino acid receptors and, R689
  - volume expansion and, newborn (lamb), R651
- Heat, exposure, thermoregulation after artificially induced sunburn, R610
- Hemodialysis, hydrogen ion concentration, modulation of plasma aldosterone in, R269
- Hemorrhage
  - AV3V, CNS catecholamine content and norepinephrine release, R1064
  - stress changes, insulin sensitivity, R1033
  - sympathetic activities during, spatial and temporal differing control, R579
  - sympathoinhibition during, reversal by naloxone, R444
- Henle's loop, chloride uptake, salt-sensitive hypertension, R263
- Hepatocytes,  $\beta$ -adrenoceptors, catecholamine responsiveness, and cortisol effects (trout), R794
- Hepatopancreas, brush-border membrane vesicles, hydrogen-regulated sulfate-chloride exchange in (lobster), R255
- Hexokinase, activity, during anoxia, brain (rat, turtle), R595
- Hibernation
  - accelerated reproductive development, body fat and (ground squirrel), R646
  - freeze tolerance (turtle), R530
  - hormone-sensitive and lipoprotein lipase mRNA, white adipose tissue (marmot), R177
- Histamine, modulation, bradykinin-induced reflexes, R112

- Hormones:** *see also* specific hormone  
fluid-regulating, during exercise, blood volume increase by water immersion and, R779  
stimulation, intestinal D-glucose transport (teleost), R412
- Host preservation, cancer cachexia, IGF-I, R426**
- Hydrogen, sulfate-chloride exchange regulated by, hepatopancreatic brush-border membrane vesicles (lobster), R255**
- Hydrogen ions, concentration, modulation of plasma aldosterone in, R269**
- Hyperosmolality, acute and chronic, cardiovascular responses to, vasopressin and, R25**
- Hyperphagia, adipocyte size relations, developing male obese rats, R33**
- Hypertension**  
genetic, age-dependent changes in afferent renal nerve, R834  
 $\gamma$ -MSH effects in, cardiovascular and renal, R77  
neurogenic, carotid chemoreceptor effects on arterial pressure, R677  
salt-induced  
reduced kidney mass, pressure natriuresis and angiotensin II in, R61  
renal nerves and, uninephrectomy, R733  
salt-sensitive, loop chloride uptake and, R263  
sodium excretion and, calcium antagonist-induced, R432  
spontaneous  
age-dependent lymphocyte depression, R1  
sodium and calcium intake in, dietary calcium effects, R370  
vascular fatty acids, prostanooids and, swimming effects, R464
- Hypertrophy**  
muscle  
gene expression, stretch, and force generation, R356  
gene expression changes with altered weight bearing, R329
- Hyperventilation, acute acid load, intracellular bicarbonate buffer system in response to, R305**
- Hypoglycemia, insulin-induced, adrenal catecholamine secretion during, R659**
- Hypotension**  
hemorrhagic, spatial and temporal control, sympathetic activities, R579  
sympathetic nerve activity, naloxone and, during hemorrhage, R444  
vasopressin and, awake state, R51  
water and sodium chloride intake, angiotensin-related, R382
- Hypothalamus**  
aging, vasopressin and renal function, R826  
anterior, coronary vasoconstriction, R276  
electrical and chemical stimulations, feeding suppression and, R586  
excitatory amino acid receptors, stress-induced tachycardia and, R689  
paraventricular anterior, catecholamine content and norepinephrine release, R1064  
stimulation, pressor effects in pregnancy, R604
- ventromedial, sympathetic FFA mobilization, fasting effects, R981
- Hypothermia**  
antifreeze proteins, inhibition of calcium and potassium currents, R542  
preoptic norepinephrine-induced, mediation by  $\alpha_2$ -adrenoceptors, R407  
prolonged stable, blood gases and pH in (rat, squirrel), R190
- Hypovolemia, dehydration and, central ANP administration, awake state, R746**
- Hypoxemia, intrauterine, erythropoietin administration, fetal iron and cytochrome c status after (sheep), R485**
- Hypoxia**  
acute, metabolism and ventilation in, R1040  
cyanide excitation, medullary sympathetic neurons, R182  
temperature and, cerebral blood flow (turtle), R538
- IGF-I: *see* Insulin-like growth factor I**
- Immersion**  
blood volume increase caused by, fluid-regulating hormones during exercise, R779  
cold water, thermoregulation after artificially induced sunburn, R617  
sympathoadrenal and dopa-dopamine systems and, R993  
Indomethacin, sodium-chloride transport and, colon (horse), R939
- Insulin**  
antinatriuresis, in euglycemia, verapamil prevention of, R1145  
metabolic changes, TNF- $\alpha$  effects and adrenergic blockade, R628  
secretion, age and gender effects, R671  
sensitivity, stress changes, R1033  
sucrose-induced elevation, microvascular injury, selenium and, R144
- Insulin-like growth factor I, host and tumor responses to, cancer cachexia, R426**
- Interleukin-6**  
acute-phase protein gene expression kinetics, R786  
TNF and fever, aging changes, R211
- Intestine**  
glucose transport, hormone stimulation of (teleost), R412  
regulation of calbindin mRNA (chicken), R800  
satiety, CCK-receptor antagonists and, R554
- Ions, liquid, concentration, lung, fetus (sheep), R1117**
- Iron**  
acquisition, diminished, Belgrade laboratory rats, R220  
status, intrauterine hypoxemia and erythropoietin, fetus (sheep), R485
- Ischemia, cardiac, reperfusion and, metabolic and cardiodynamic responses (turtle), R437**
- Isoproterenol**  
hydromineral balance and, R382  
maximum heart rate in response to (shrew), R842
- Kidney**  
blood flow: *see* Blood flow  
function  
basal, EDRF control of, R720
- mercury from tooth fillings and, R716  
reduced renal arterial perfusion pressure (chick), R90  
vasopressin relations in aging, R826  
volume expansion and, newborn (lamb), R651  
interstitial hydrostatic pressure, verapamil-induced natriuresis, R432  
intrarenal hemodynamics,  $\alpha_1$ -adrenergic blockade effects, heart failure, R198  
micropuncture study, prolactin effects (bird), R933  
reduced mass, salt-induced hypertension, R61  
stimulus-response curves, plasma renin activity and, fetus and newborn (lamb), R524  
urodilatin and ANP, comparison of action, R395
- Kidney glomerulus**  
angiotensin II stimulated aldosterone secretion, endothelin-1 effects, R85  
dynamics, heart failure, R198
- Kidney tubules, bradykinin effects, B<sub>1</sub>- and B<sub>2</sub>-kinin receptors in, R72**
- Kynurenic acid, excitatory amino acid receptors, hypothalamic, tachycardia and, R689**
- Lactate**  
blood, regulation, exercise and recovery, R126  
energetic cost of locomotion (wallaby), R771  
intermittent exercise, endurance and (ghost crab), R852  
metabolic changes, TNF- $\alpha$  effects and adrenergic blockade, R628  
metabolic fate of, after vigorous exercise (frog), R245
- Lipids**  
accelerated reproductive development, body fat and (ground squirrel), R646  
dietary, modulation of connective tissue matrix, abdominal aorta, R389  
intravenous, daily food intake and, R225  
metabolism, white adipose tissue, hibernation and (marmot), R177  
sucrose-induced elevation, microvascular injury, selenium and, R144
- Lipopolysaccharides**  
acute-phase protein gene expression kinetics, R786  
age-dependent lymphoid function, spontaneous hypertension, R1  
fever, aging changes, R211
- Lipoprotein lipase, mRNA concentrations, seasonal changes in, white adipose tissue (marmot), R177**
- Lithium, urodilatin and ANP actions, kidney, R395**
- Liver**  
erythropoiesis, iron status and, fetus (sheep), R485  
metabolic fate of lactate, after vigorous exercise (frog), R245  
triacylglycerol changes, during development, R8
- Loading, oral, water or saline, fluid retention after (camel), R915**
- Locomotion, energetic cost of (wallaby), R771**
- Locus ceruleus, spinobulbospinal micturition, modulation of pathway, R478**

- Lung**  
inflation, control of air breath duration (lungfish), R879  
liquid secretion, intravenous saline infusion effects, fetus (sheep), R1117
- Lymphatics, pumping, increased neck vein pressure effects, awake state (sheep), R892**
- Lymph flow, intestinal pressure, increased neck vein pressure effects, awake state (sheep), R892**
- Lymphocytes, depression, age-dependent, hypertension, R1**
- Magnetic resonance imaging, measurement, circadian variations in CSF, R20**
- Manganese, transport, blood-nerve barrier, peripheral nerve, R284**
- Maturation: see also Development; Growth acetazolamide-altered pH and bicarbonate, choroid plexus, cerebrospinal fluid, and brain, R909 corn oil and sucrose, ontogeny of intake, R624 respiratory patterns, fetal (lamb), R452**
- Medullary raphe complex, sympathetic nerve discharge, rhythms of, brain stem lesion effects, R1015**
- $\gamma$ -Melanocyte-stimulating hormone, cardiovascular and renal effects of, spontaneous hypertension, R77**
- Melatonin**  
high-affinity binding sites, cerebral cortex, pineal modulation of, R698  
seasonal variation, circadian rhythms, R885
- Membrane, iron transport, diminished, Belgrade laboratory rats, R220**
- Mercury, dental tooth fillings, R716**
- Metabolic control, identification of control sites, R806**
- Metabolic depression, response to ischemia and reperfusion, heart (turtle), R437**
- Metabolic systems, external control sites, identification of, R806**
- Methionine, methylmercury transport by, blood-brain barrier, R761**
- Methoxamine, baroreflex function, pregnancy, awake state, R472**
- Methylmercury, transport by amino acid carrier, blood-brain barrier, R761**
- 17 $\alpha$ -Methyltestosterone, stimulation, intestinal D-glucose transport (teleost), R412**
- Microcirculation: see also Blood flow; Circulation**  
sucrose-induced metabolites, selenium and, R144

- Pro-opiomelanocortin,  $\gamma$ -MSH effects, spontaneous hypertension, R77
- Prostaglandin  
pressor responsiveness of, NMA and nitroarginine potentiation of, awake state, R1137
- Prostanoids  
sodium-chloride transport and, colon (horse), R939  
vascular fatty acids and, swimming effects, E464
- Protein  
antifreeze, inhibition of calcium and potassium currents, R542  
uncoupling, brown fat atrophy after capsaicin, R562
- Pump, sodium, brain, pineal modulation of, R698
- Pyridoxal, transport, placenta, ethanol effects, R966
- Pyruvate, mitochondrial production of, recovery metabolism of white muscle and (trout), R295
- Ramipril, thirst, brain angiotensin and (cattle), R204
- Receptors  
adrenoceptors, regulation of galanin and norepinephrine, pancreas, R819  
 $\alpha_2$ -adrenoceptors, preoptic norepinephrine-induced hyperthermia, R407  
 $\beta$ -adrenoceptors, hepatocyte, cortisol effects (trout), R794  
amino acid, stress-induced tachycardia and, R689  
B<sub>1</sub>- and B<sub>2</sub>-kinin, bradykinin effects, kidney tubules, R72  
carotid vascular, adrenal catecholamine secretion and, R872
- CCK  
antagonist, intestinal satiety and, R554  
attenuation of satiety actions of CCK, R46
- CCK-A  
mediation of CCK effects on vasopressin (pig), R1154  
mediation of CCK-induced satiety, R574
- chemoreceptors  
carotid, arterial pressure and, R677  
renal, salt-induced hypertension in uninephrectomy, R733  
glucocorticoid and progestin, type II, blocker of, dietary obesity and, R1106  
presynaptic, smooth muscle, R400  
pulmonary, control of air breath duration (lungfish), R879  
pulmonary stretch, discharge patterns, bulbospinal neurons, R1075  
renal, afferent inputs to ascending spinal pathways, R165  
V<sub>1</sub>- and V<sub>2</sub>-, vasopressin, fetal (sheep), R636
- Recovery metabolism, white muscle, mitochondria role in (trout), R295
- Rectal gland, chloride secretion, C-type natriuretic peptide stimulation of (dogfish), R707
- Reflexes  
arterial baroreceptor, sinoaortic denervation effects, pregnancy, R1100  
baroreflexes  
arterial, during hemorrhage, R579  
bradycardia mediated by, pregnancy, awake state, R472  
cardiopulmonary, volume expansion and, newborn (lamb), R651  
carotid sinus, adrenal catecholamine secretion, R872  
differential responses, expiratory bulbospinal neurons, R1075, R1087

Reflexes (*continued*)

- gastric-cardiovascular, bradykinin-induced, histamine modulation of, R112
- Hering-Breuer, control of air breath duration (lungfish), R879
- micturition, modulation of pathway, R478
- Regulatory sites, metabolic systems, R806
- Renal concentrating ability, vasopressin and, aging, R826
- Renal nerves
  - normal unrestrained activity, blood flow variations, R926
  - renin gene expression and, transition from fetal to newborn (lamb), R459
  - salt-induced hypertension, sinoaortic-denervated uninephrectomy and, R733
- Renin
  - gene expression, renal nerve modulation at birth (lamb), R459
  - plasma activity
    - blood volume increase by water immersion and, R779
    - food deprivation and refeeding effects (camel), R1000
    - oral loading with saline or water (camel), R915
    - renal perfusion pressure decreases and, fetus and newborn (lamb), R524
- Renin-angiotensin-aldosterone system, renal response to ANF, captopril effects, high-output heart failure, R509
- Renin-angiotensin system
  - hydromineral balance and, R382
  - sodium appetite, acute sodium deficit and, R419
- Reproduction, accelerated development, body fat and (ground squirrel), R646
- Resistance
  - afferent and efferent arteriolar, heart failure, R198
  - insulin, stress changes, R1033
  - renal vascular, area postrema stimulation and, R289
  - total peripheral, ANP actions, awake state, R120
  - vascular, renal and mesenteric, pregnancy, R604
- Respiration
  - air breath duration, control with lung inflation (lungfish), R879
  - patterns, developmental changes, fetus (lamb), R452
- Respiratory pattern
  - acute hypoxia, R1040
  - expiratory bulbospinal neurons, R1075, R1087
- Respiratory regulation, air breath duration, control with lung inflation (lungfish), R879
- Respiratory response, neuropeptide, diabetes, nucleus tractus solitarius, R865
- Rhythms
  - circadian
    - brown fat thermogenesis and, R504
    - cerebral cortex, pineal modulation of, R698
    - resetting, phase-response relations (hamster), R1149
    - seasonal variation in, R885
  - circannual, estradiol phase-shifts (squirrel), R1096

- diurnal, bone metabolism of calcium, R235
- 10-Hz
  - sympathetic nerve discharge, R1006
  - sympathetic nerve discharge, brain stem lesion effects, R1015
- Ribonucleic acid, messenger, lipoprotein lipase, seasonal changes in, white adipose tissue (marmot), R177

- Spectroscopy, nuclear magnetic resonance, ischemia and reperfusion, heart (turtle), R437
- Spinal cord, blood-nerve barrier, manganese transport across, R284
- Spinal pathways, ascending, renal afferent inputs to, R165
- Spinobulbospinal micturition, reflex pathway, modulation of, R478
- Spleen, volume, pinniped (seal, sea lion), R322
- Stress, changes, insulin sensitivity, R1033
- Subcellular enzyme, binding, glycolysis and, anoxic brain (turtle), R517
- Sucrose
  - changes related to, vertebrae, R318
  - intake, ontogeny of, preweanling, R624
  - metabolite elevation induced by, microvascular injury, selenium and, R144
  - sham feeding, chronic decerebration, R1070
- Sugar, intake, ontogeny of, preweanling, R624
- Sulfate-chloride exchange, hydrogen-regulated, hepatopancreatic brush-border membrane vesicles (lobster), R255
- Sulfates, transport, hepatopancreatic brush-border membrane vesicles (lobster), R255
- Sunburn
  - cold water immersion after, thermoregulatory responses, R617
  - heat exposure after, thermoregulatory responses, R610
- Swallowing, concentrations thresholds for, fetus (sheep), R1057
- Sweating, responses, thermoregulation after sunburn, R610, R617
- Swimming: *see* Exercise
- Sympathetic activity
- Sympathetic nerve
  - activity
    - naloxone and, during hemorrhage, R444
    - spatial and temporal differing control, during hemorrhage, R579
  - discharge
    - 10-Hz rhythm, R1006

- 10-Hz rhythm, brain stem lesion effects, R1015  
 postganglionic, discharges of, relationships, R717  
 renal  
   activity, volume expansion effects, newborn (lamb), R651  
   smoke exposure and, awake state, R738  
 Sympathetic nervous system  
   area postrema stimulation, differential renal hemodynamics with two anesthetics, R289  
   brown fat atrophy, after capsaicin, R562  
   FFA mobilization, fasting effects, VMH lesion and, R981  
   hypothalamic stimulation, pregnancy, R604  
   immersion effects, R993  
    $\gamma$ -MSH effects, spontaneous hypertension, R77  
   regulation of galanin and norepinephrine, pancreas, R819  
   response to exercise, low temperatures, R921  
 Sympathoadrenal system, immersion effects, R993  
 Sympathoinhibition, reversal by naloxone, during hemorrhage, R444
- Tachycardia, stress-induced, hypothalamic excitatory amino acid receptors and, R689  
 Taenia coli, stretch-mediated growth, R895  
 Taste: see Gustatory response  
 Temperature  
   anoxia and, cerebral blood flow (turtle), R538  
   low, sympathetic nervous system response to exercise in, R921  
   regulation, after artificially induced sunburn, R610, R617  
   rhythm, sleep dissociation, R885  
 Temperature, body  
   dehydration and hypovolemia, central ANP effects, R746  
   ear, neurogenic vasodilator control of, R766  
   pH and blood gases, prolonged stable hypothermia (rat, squirrel), R190  
 Terazosin,  $\alpha_1$ -adrenergic blockade with, glomerular dynamics in heart failure, R198  
 Testosterone  
   accelerated development, body fat and (ground squirrel), R646  
   stimulation, intestinal D-glucose transport (teleost), R412  
 Thermal pulse decay, blood flow assessment, reduced renal arterial perfusion pressure (chick), R90  
 Thermogenesis  
   body weight regulation and, capsaicin, R568  
   brown fat, circadian changes in, R504  
 Thermoregulation  
   accelerated reproductive development, body fat and (ground squirrel), R646  
   brown fat, circadian changes in, R504  
   cold, after artificially induced sunburn, R617  
   heat, after artificially induced sunburn, R610  
   hypothalamic norepinephrine, R407  
   vasopressin-induced antipyresis, medial amygdaloid nucleus, awake state, R901  
   Thirst: see Drinking  
   Thyroxine, food deprivation, refeeding and (camel), R1000  
   TNF: see Tumor necrosis factor  
   Transferrin, impaired iron metabolism, Belgrade laboratory rats, R220  
   Triacylglycerol changes  
     fetal and early postnatal development, R8  
     postnatal development, R8  
   Triglycerides, sucrose-induced elevation, microvascular injury, R144  
   Tumor cell cycle, population distribution, cancer cachexia, IGF-I and, R426  
   Tumor necrosis factor, interleukin-6 and fever, aging changes, R211  
   Tumor necrosis factor- $\alpha$   
     administration by adrenergic blockade, glucose metabolic changes and, R628  
     monoclonal antibody, endotoxin-induced acute-phase protein gene expression, R786
- Ultraviolet radiation  
   cold water immersion after, thermoregulatory responses, R617  
   heat exposure after, thermoregulation responses, R610  
 Uninephrectomy, sinoaortic-denervated, salt-induced hypertension, renal nerve effects, R733  
 Urea, metabolism, food deprivation and refeeding effects (camel), R1000  
 Urinary bladder, spinobulbospinal micturition, modulation of pathway, R478  
 Urine  
   flow, bradykinin effects, kidney tubules, R72  
   osmolality, vasopressin and, aging, R826  
 Urodilatin, renal actions, comparison with ANP, R395  
 Uterus  
   captopril effects, pregnant mother and fetus (sheep), R754  
   reproductive tissues, blood flow to, measurement of, R666
- Vagal afferents, spatial and temporal differing control, during hemorrhage, R579  
 Vagina, reproductive tissues, blood flow to, measurement of, R666  
 Vagotomy, carotid vascular receptor control, adrenal catecholamine secretion, R872  
 Vagus nerve  
   air breath duration, control with lung inflation (lungfish), R879  
   pulmonary, spatial and temporal inputs, bulbospinal neurons, R1087  
 Vasoconstriction, coronary, hemodynamic patterns and, R276  
 Vasoconstrictors, pressor responsiveness of, NMA and nitroarginine potentiation of, awake state, R1137  
 Vasodilation, active, ear blood flow, R766  
 Vasodilator, neurogenic control, blood flow, ear, R766
- Vasopressin: see also Antidiuretic hormone  
 ACTH secretion and, medullary pathways for, R1047  
 acute and chronic hyperosmolality effects, R25  
 antipyresis induced by, medial amygdaloid nucleus, awake state, R901  
 CCK effects, CCK-A receptor mediation of (pig), R1154  
 central ANP effects, dehydration and hypovolemia, R746  
 during exercise, blood volume increase by water immersion and, R779  
 hypotension and, awake state, R51  
 neurohypophyseal homeostasis, model, R1121  
 renal and cardiovascular responses to, fetal,  $V_1$ - and  $V_2$ -receptors and (sheep), R636  
 renal concentrating ability and, aging, R826  
 responses, progressive water deprivation, R310  
 salt-induced hypertension, renal nerves and, uninephrectomy, R733  
 secretion, concentration thresholds for, fetus (sheep), R1057  
 sinoaortic denervation effects, pressor responses in pregnancy, R1100  
 Ventilation, acute hypoxia, R1040  
 Verapamil  
   insulin antinatriuresis and, euglycemia, R1145  
   natriuresis induced by, renal interstitial hydrostatic pressure during, R432  
 Vertebrae, mechanical properties of, diet-related changes, R318  
 Vitamin B<sub>6</sub>, transport, placenta, ethanol effects, R966  
 VMH: see Hypothalamus, ventromedial  
 Volume  
   blood: see Blood volume  
   expansion, cardiopulmonary baroreflex and, newborn (lamb), R651  
   glomerular, analbuminemia, aging and, R947  
   overload, cardiac gene expression, R364  
   regulation, intravenous saline and, lung, fetus (sheep), R1117  
   splenic, pinniped (seal, sea lion), R322
- Water  
 deprivation, progressive, cerebral metabolic responses, R310  
 intake  
   angiotensin-related, R382  
   brain angiotensin and (cattle), R204  
   dietary calcium effects, spontaneous hypertension, R370  
   sucrose and corn oil, preweanling, R624  
   oral loading with, fluid retention after (camel), R915
- Weight  
 body  
   estradiol phase-shifts circannual rhythms (squirrel), R1096  
   nutrient effects on food intake, R225  
   regulation, capsaicin and, R568
- Xanthurenic acid, excitatory amino acid receptors, hypothalamic, tachycardia and, R689  
 Yohimbine, regulation of galanin and norepinephrine and, pancreas, R819
